# AGS Solutions wins Gold Safety Excellence Award

All Baytown, Awards

June 12, 2023

Recently, ExxonMobil Baytown Area attended the 36<sup>th</sup> Annual Houston Safety Excellence Awards Banquet where AGS Solutions, a small woman owned business and longtime vendor supplying ExxonMobil with Industrial specialty cleaners, took home the gold in the category of Small Environmental.

Held by Houston Business Roundtable and Houston Area Safety Council, the Houston Safety Excellence Awards is annually presented to contractor companies in the Texas Gulf Coast Area who have been nominated by owner or contract companies and who have achieved an outstanding record of on-the-job safety promotion and performance.

AGS Solutions has been with the Baytown Refinery for a little over 20 years and have also served the Beaumont Complex for 30 years. "This small, minority owned business stepped up to the plate during COVID providing things we were in desperate need of like disinfectant wipes, sanitizers, disinfectant cleaners, and more," said Contracts Administration Lisa Wright. "They were incredible and they are great to work with."

AGS Solutions was also acknowledged in ExxonMobil's annual global sustainability report as one of three small, diverse global vendors that provided hard to get items during the height of the pandemic. Throughout their 20 years with the Baytown Refinery they have had no lost time, injury or illness and will be adding ExxonMobil's Baton Rouge site as their newest business partner soon.

"ExxonMobil has always set high expectations for its vendors and in return it helps AGS continuously improve and keeps us competitive" said AGS Solutions President Linda Whiteley. "We appreciate the strong partnership and the chance to keep learning and growing together."

Congratulations to AGS Solutions on this well-deserved award!
