

Water Mission - The Perfect Solution

How much do you know about the global water crisis? Nearly 1.8 billion people live without access to safe drinking water and approximately 842,000 of them DIE yearly due to diseases caused by contaminated water. AGS Solutions, Inc., who regards environmental protection as our duty, is proud of sponsoring Water Mission to save more people's lives and *Work Towards a Cleaner World™*. Water Mission, an engineering nonprofit organization, is aimed at solving and mitigating the serious global water crisis with Water, Sanitation and Hygiene (WASH) solutions for countries where scarcity of safe water exists. Over 3,300,000 people in more than 50 countries were provided access to safe water and sanitation through its propriety, patented Living Water Treatment Systems (LWTS) using solar pumping technology. Water Mission also responds to disasters and in emergency situations such as Hurricane Matthew that destroyed western Haiti in 2016 and in northern Uganda to provide safe water to thousands of refugees fleeing South Sudan. Both AGS Solutions, Inc. and Water Mission share a commitment to provide products and solutions that are safe, sustainable, environmentally friendly, and simple to operate. AGS's mission of *Working Towards a Cleaner World™* fits well with Water Mission's global mission of providing safe drinking water to communities in need.
